Regarding Optimus Prime

*****ATTENTION! INFORMATION WAS UPDATED!!!*****

We have noticed that not all accounts were able to handle all Master's trade. Therefore we were forced to add several restrictions.

1. Optimus Prime can be chosen for accounts which deposit is equal or more then \$350. Therefore this Master is available in dropdown only after client's account is connected and balance is updated on site.
2. Lot size for this particular account is calculated with separate formula: 0,01 per each \$350. If you want to know your lot size just divide your current balance between 35000 and then you'll have the lot size you should choose.

Example: $46785 / 35000 = 0.13$ lot size.

The rest of the Master Traders are available with same settings as they were. We still accept accounts with deposit starting from \$100, and lot size per other Masters are calculated as it was before: 0.01 per each \$100. However for Mr Consistency we recommend to use the lowest lot size as this is ultra risky Master Trader and number of opened positions can be up to 12 or more.
